

Region IV Referee Coordinator Report October 2006

- Seattle National Cups: We had a total of 36 Referees from 10 different states which was outstanding compared to other years, also there was 10 National Assessors from 6 different State Associations present for assessments so all referees were assessed at one time or another.
- Utah State Select : Once again we had referees totaling 17 referees from 6 different state with 4 assessors all games seem to went well.
- Los Vegas U-23: There were a total of 6 referees from 4 different states and 2 Assessors, and once again the games were serviced quiet well.

The level of these games are quiet high in order to properly service these games we need to have National Referees, National Candidate, and experienced grade 5's.

Several states are sending lower grade level referees and with a few exceptions those referees are not adequate for these games, I understand that we sometimes cannot get the top referees that we would like, we should strive to send the best that we have.

Eric A. Beck
